histone acetylation
G−protein coupled receptor activity
Hydroxyacid oxidase
SCY1−like protein 2
proprotein convertase subtilisin kexin type
Heat shock 70 kDa protein 12A−like
SOCS box
Belongs to the WD repeat SEC13 family
GRAM domain containing 1B
proton transmembrane transport
cellular macromolecule catabolic process
Kelch−like family member 7
TBC1 domain family member
cationic amino acid transporter
calcium ion transport
inhibin, beta A
Phytanoyl−CoA dioxygenase (PhyH)
regulation of cardiac muscle myoblast proliferation
Protein tyrosine kinase
