Nuclear structure
Defense mechanisms
Cell motility
Replication, recombination and repair
Cell wall/membrane/envelope biogenesis
Posttranslational modification, protein turnover, chaperones
Amino acid transport and metabolism
Intracellular trafficking, secretion, and vesicular transport
Signal transduction mechanisms
Lipid transport and metabolism
Secondary metabolites biosynthesis, transport and catabolism
Inorganic ion transport and metabolism
Energy production and conversion
Carbohydrate transport and metabolism
Cytoskeleton
Translation, ribosomal structure and biogenesis
Transcription
Extracellular structures
Chromatin structure and dynamics
Cell cycle control, cell division, chromosome partitioning
Coenzyme transport and metabolism
RNA processing and modification
Nucleotide transport and metabolism
