signed −log10 p (unadjusted)
Secondary metabolites biosynthesis, transport and catabolism
Signal transduction mechanisms
Extracellular structures
Cytoskeleton
Chromatin structure and dynamics
Nuclear structure
Replication, recombination and repair
Defense mechanisms
Cell cycle control, cell division, chromosome partitioning
Transcription
Posttranslational modification, protein turnover, chaperones
Lipid transport and metabolism
Intracellular trafficking, secretion, and vesicular transport
RNA processing and modification
Nucleotide transport and metabolism
Inorganic ion transport and metabolism
Amino acid transport and metabolism
Carbohydrate transport and metabolism
Cell wall/membrane/envelope biogenesis
Cell motility
Translation, ribosomal structure and biogenesis
Energy production and conversion
Coenzyme transport and metabolism
