log2 fold change
Cell motility
Nuclear structure
Replication, recombination and repair
Secondary metabolites biosynthesis, transport and catabolism
Signal transduction mechanisms
Extracellular structures
Cell cycle control, cell division, chromosome partitioning
Chromatin structure and dynamics
Inorganic ion transport and metabolism
Amino acid transport and metabolism
Carbohydrate transport and metabolism
Cell wall/membrane/envelope biogenesis
Translation, ribosomal structure and biogenesis
Energy production and conversion
Coenzyme transport and metabolism
Defense mechanisms
Intracellular trafficking, secretion, and vesicular transport
RNA processing and modification
Nucleotide transport and metabolism
Lipid transport and metabolism
Posttranslational modification, protein turnover, chaperones
Cytoskeleton
Transcription
