Cell motility
Replication, recombination and repair
Nuclear structure
Coenzyme transport and metabolism
Translation, ribosomal structure and biogenesis
Energy production and conversion
Inorganic ion transport and metabolism
Amino acid transport and metabolism
Cell wall/membrane/envelope biogenesis
Defense mechanisms
Intracellular trafficking, secretion, and vesicular transport
RNA processing and modification
Nucleotide transport and metabolism
Posttranslational modification, protein turnover, chaperones
Lipid transport and metabolism
Transcription
Cell cycle control, cell division, chromosome partitioning
Cytoskeleton
Chromatin structure and dynamics
Signal transduction mechanisms
Secondary metabolites biosynthesis, transport and catabolism
Carbohydrate transport and metabolism
Extracellular structures
