signed −log10 p (unadjusted)
Replication, recombination and repair
Nuclear structure
Defense mechanisms
Transcription
Cell cycle control, cell division, chromosome partitioning
Extracellular structures
Cytoskeleton
Chromatin structure and dynamics
Amino acid transport and metabolism
Signal transduction mechanisms
Secondary metabolites biosynthesis, transport and catabolism
Cell wall/membrane/envelope biogenesis
Carbohydrate transport and metabolism
Inorganic ion transport and metabolism
Posttranslational modification, protein turnover, chaperones
Lipid transport and metabolism
Cell motility
Translation, ribosomal structure and biogenesis
Intracellular trafficking, secretion, and vesicular transport
Energy production and conversion
Coenzyme transport and metabolism
RNA processing and modification
Nucleotide transport and metabolism
