log2 fold change
Translation, ribosomal structure and biogenesis
Nuclear structure
Inorganic ion transport and metabolism
Extracellular structures
Amino acid transport and metabolism
Signal transduction mechanisms
Secondary metabolites biosynthesis, transport and catabolism
Cell wall/membrane/envelope biogenesis
Coenzyme transport and metabolism
Cell motility
Nucleotide transport and metabolism
Transcription
RNA processing and modification
Energy production and conversion
Chromatin structure and dynamics
Cytoskeleton
Cell cycle control, cell division, chromosome partitioning
Replication, recombination and repair
Lipid transport and metabolism
Function Unknown
Posttranslational modification, protein turnover, chaperones
Intracellular trafficking, secretion, and vesicular transport
Carbohydrate transport and metabolism
Defense mechanisms
